Art Unit: 1752

## **DETAILED ACTION**

This Office action is in response to the amendment received February 4, 2002.

- 1. The rejection under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention is withdrawn in light of the amendment to claim 1 by applicant.
- 2. The rejection under 35 U.S.C. 102(e) as being anticipated by HADA ET AL or AOAI ET AL is withdrawn based on the prior art composition lacking the claimed repeating unit of (AI).
- The rejection under 35 U.S.C. 103(a) as being unpatentable over HADA ET AL and AOAI ET AL in combination is withdrawn based on the prior art composition lacking the claimed repeating unit of (AI).

## Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-25 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 4-6 of copending Application No. 09/577,884.

Application/Control Number: 09/620,708

Art Unit: 1752

The claimed invention is drawn to a positive photoresist composition comprising:

(A) a compound capable of generating an acid upon irradiation with actinic rays or radiation and

(B) a resin capable of decomposing under the action of an acid to increase the solubility in alkali, containing a repeating unit having a group represented by formula (AI).

Claim 9 recites the additional presence of a fluorine-containing and/or silicon-containing surfactant in the positive photoresist composition.

Claim 18 recites a specific solvent in the positive photoresist composition.

Copending application 09/577,884 claims a positive photoresist composition for ultraviolet exposure, comprising: a compound which generates an acid upon exposure to actinic rays or radiation, a resin having a repeating unit represented by the following formula (I) and being capable of decomposing under the action of an acid to increase the solubility in alkali and a fluorine-containing surfactant and/or silicon-containing surfactant.

Applicants are directed to claims 5 and 6 in copending application 09/577,884, which disclose a repeating unit (II) and (II'), respectively those overlap and are obvious over the claimed repeating unit of formula (AI) of the current application in claim 1. In addition formula (I) in copending application 09/577,884 overlaps and is obvious over the repeating unit of formula (II) found in claim 3 of the current application. Thus the same copolymer is claimed in both applications wherein the copolymers overlap with one another and are obvious over one another. A patent to application 09/620,708 would extend any grant to 09/577,884.

This is a provisional obviousness-type double patenting rejection.
